

MINI SWEEPER

5021 TSL

The Mini Sweeper adopts single engine and drives with its complete hydraulic system. It is manufactured with advanced technology from America, while its engine is made in Japan. It uses the standard 240L bin and is equipped with 150L clean water tank. The sweeper is equipped with air conditioning which allows the operator to enjoy comfortable work environment under different weather conditions. It is also equipped with LED monitor which makes it convenient to check the status during sweeping and reversing.

The product is well known amongst domestic small sweeper market. The vehicle has flexible and articulate turning, which makes it suitable for cleaning small areas such as parking lots, walkways, gardens and buildings.
